# TASK 1: Create a GIT repository named as your enrollment number. Create 2 folder in your repository named as Assinment_1 and Assignment_2.

**Step 1: Create a New Local Git Repository**

- I logged into GitHub..
- Clicked on "New Repository".
- Entered my 2302031000045 as the repository name.
- Selected the repository as Public/Private.
- Clicked on "Create Repository".

Step 2: Setting Up the Repository Locally.

- Installed Git if not already installed.
- Opened Git Bash/Command prompt.
- Ran the following command to clone my repository to my computer.
  - Git clone https://https://github.com/khushimevada/2302031000045.git
- Navigated to the cloned Repository:
  - Cd :WT/2302031000045

Step 3: Creating Assignment Folders:
- Create Assignment folders inside the repository.
  - mkdir  Assignment_1  Assignment_2
- Verify folders using following command.
  - ls

Step 4: Adding and Committing Changes:
- Staged the new folders:
  - Git add.
- Committed the changes with a message:
  - Git commit-m "Added Assignment_1 and Assignment_2 folders"
- Push the changes to Github :
  - Git push origin main
